

Welding — Welding of reinforcing steel —

Part 1: Load-bearing welded joints

ICS 25.160.10

National foreword

This British Standard is the UK implementation of EN ISO 17660-1:2006. It is identical with ISO 17660-1:2006. Together with BS EN ISO 17760-2:2006 it supersedes BS 7123:1989 which is withdrawn.

One of the principal differences between BS 7123 and this standard is that BS 7123 offered more practical guidance on the welding process issues, some of these issues have been highlighted in the National Annex and further guidance can be found in parts 1 to 3 of BS EN 1011. This standard is best used in conjunction with the National Annexes and the general good practices set out in the BS EN 1011 series.

The UK participation in its preparation was entrusted to Technical Committee, WEE/43, Welding of steel for concrete reinforcement.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 March 2008
