

BSI Standards Publication

**Solid biofuels - Safety of solid biofuel pellets
- Safe handling and storage of wood pellets in
residential and other small-scale applications**

National foreword

This British Standard is the UK implementation of EN ISO 20023:2018. It is identical to ISO 20023:2018.

The UK participation in its preparation was entrusted to Technical Committee PTI/17, Solid biofuels.

A list of organizations represented on this committee can be obtained on request to its secretary.

The UK committee draws users' attention to the fact that this standard is not intended to cover all aspects of safe handling and storage of solid biofuel pellets. The committee therefore recommends that users of the standard determine the regulatory requirements and safe practices of both consumers and industry operatives, e.g. Personal Protective Equipment (PPE), manual lifting of bagged pellets, electrical regulations and lightning strike risks and protection.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
