

BS EN ISO 4254-10:2009

Incorporating corrigenda October 2010 and June 2011

BSI Standards Publication

Agricultural machinery — Safety

Part 10: Rotary tedders and rakes (ISO
4254-10:2009)

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of EN ISO 4254-10:2009, incorporating corrigendum October 2010. It is identical to ISO 4254-10:2009.

The UK participation in its preparation was entrusted to Technical Committee AGE/32, Agricultural implements and trailers.

A list of organizations represented on this committee can be obtained on request to its secretary.

WARNING BSI, as a member of CEN, is obliged to publish EN ISO 4254-10:2009 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval as a European Standard.

The UK committee, AGE/32, is concerned that the provisions contained in the scope do not cover the state of the art rotary tedders and rakes, and the many types of machines of various similar applications, already in the market place.

This standard is applicable to machines specifically described in the scope (Clause 1) and defined in the terms and definitions (Clause 3). Users are warned that if the provisions of this standard are applied to the manufacture of machinery or combined associative machines not described or defined in these clauses then there could be a serious health and safety implication.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
