National foreword

This British Standard has been prepared under the direction of the Aerospace Standards Committee. It is identical with ISO 2315:1980 “*Aircraft — Two- and four-pole sealed electromagnetic relays, 2 A and 3 A — Clearance and fixing dimensions*” published by the International Organization for Standardization (ISO). The United Kingdom has taken an active part of the work of Technical Committee ISO/TC 20/SC 1, Aerospace electrical requirements, of ISO.

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is especially drawn to the following: The comma has been used as a decimal marker in relation to metric units. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words “International Standard” appear, referring to this Standard, they should be read as “British Standard”.
A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
