...making excellence a habit.™

National foreword

This British Standard is the UK implementation of ISO 17894:2005.

The standards listed in Clause 2 (normative references) include source documents for terms and definitions reproduced in Clause 3 and, in accordance with D.1.4 of the ISO/IEC Directives, Part 2 (2004), these references are informative. The UK committee would like to emphasize that this standard can be applied as a stand alone document and no other publication is indispensable to its application. However, the bibliography lists seven 'primary standards' that are extensively cited in informative Annex B and that these are helpful in the application of BS ISO 17894:2005.

The UK participation in its preparation was entrusted to Technical Committee SME/32, Ships and marine technology - Steering committee.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
