January 2012*

**BSI Standards Publication**

# **Performance standards in building — Definition and calculation of area and space indicators**

**bsi.**

...making excellence a habit.™

**National foreword**

This British Standard is the UK implementation of ISO 9836:2011. Together with BS EN 15221-6:2011, it supersedes BS 7641:1993, which is withdrawn.

The UK participation in its presentation was entrusted to Technical Committee CB/101, Service Life Planning.

A list of organizations represented on this committee can be obtained on request to its secretary.

This standard has been drafted in the context of the performance of buildings. However, to assist the user in understanding the differences between this standard and the Royal Institution of Chartered Surveyors' Code of Measuring Practice, which is used in the UK for measuring floor area for commercial purposes, and BS EN 15221-6, which was drafted in the context of Facilities Management, guidance is provided in National Annex NA.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

**Compliance with a British Standard cannot confer immunity from legal obligations.**
