

Execution of steel structures —

Part 6: Supplementary rules for stainless steel

ICS 91.080.10

National foreword

This Draft for Development has been prepared by Technical Committee B/521 and comprises the English language version of ENV 1090-6:2000 *Execution of steel structures — Part 6: Supplementary rules for stainless steels*, as published by the European Committee for Standardization (CEN), plus the National Application Document to be used with the ENV in the execution of buildings to be erected in the United Kingdom.

This publication is not to be regarded as a British Standard.

An ENV is made available for provisional application, but does not have the status of a European Standard. The aim is to use the experience gained to modify the ENV so that it can be adopted as a European Standard in the future. During the ENV period of validity, reference should be made to the supporting documents listed in the National Application Document (NAD).

The purpose of the NAD is to provide essential information, particularly in relation to safety, to enable the ENV to be used for buildings erected in the UK. The NAD takes precedence over corresponding provisions in the ENV.

ENV 1090-6:2000 has been thoroughly examined and is considered to be a suitable execution standard for stainless steels, when used in conjunction with this NAD. This assumes that DD ENV 1090-1 comprising ENV 1090-1 and its NAD are also applied.

Compliance with ENV 1090-6:2000 does not of itself confer immunity from legal obligations.

Users of this document are invited to comment on its technical content, ease of use and any ambiguities and anomalies. These comments will be taken into account when preparing the UK national response to CEN on the question of whether the ENV can be converted to an EN.

Comments should be sent in writing to BSI, 389 Chiswick High Road, London W4 4AL, quoting the document reference, the relevant item and, where possible, a proposed revision, within 2 years of the issue of this document.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references
