Oilseed residues — Determination of glucosinolates content —

Part 1:

Method using high-performance liquid
chromatography

Tourteaux de graines oléagineuses — Dosage des glucosinolates —

*Partie 1: Méthode par chromatographie en phase liquide à haute
performance*

Reference number
ISO 10633-1:1995(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 10633-1 was prepared by Technical Committee ISO/TC 34, *Agricultural food products*, Subcommittee SC 2, *Oleaginous seeds and fruits*.

ISO 10633 consists of the following parts, under the general title *Oilseed residues — Determination of glucosinolates content*:

- *Part 1: Method using high-performance liquid chromatography*
- *Part 2: Method using X-ray fluorescence spectrometry*

Annex A form an integral part of this part of ISO 10633. Annex B is for information only.
