Refractory products — Methods of test for ceramic fibre products

*Produits réfractaires — Méthodes d'essai des produits à base de fibres
céramiques*

Reference number
ISO 10635:1999(E)

Contents	Page
1 Scope	1
2 Normative references	1
3 Preparation of test pieces	1
4 Determination of thickness	2
5 Determination of bulk density	3
6 Determination of resilience	4
7 Determination of permanent linear change on heating	5
8 Determination of thermal conductivity	8
9 Determination of tensile strength	11
10 Determination of shot content	12
11 Test report	14
Annex A (informative) Calculation of the coefficient of thermal conductivity as a function of the actual temperature in each point of the test piece	19
