Textile machinery and accessories — Machine parts in contact with textile processing oils —

Part 1:

Determination of anticorrosive effect upon
steel

*Matériel pour l'industrie textile — Pièces de machines en contact avec
des huiles textiles —*

*Partie 1: Détermination du pouvoir d'inhibition à la corrosion par rapport à
l'acier*

Reference number
ISO 11659-1:1995(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 11659-1 was prepared by Technical Committee ISO/TC 72, *Textile machinery and allied machinery and accessories*, Subcommittee SC 2, *Winding and preparatory machinery for fabric manufacture*.

ISO 11659 consists of the following parts, under the general title *Textile machinery and accessories — Machine parts in contact with textile processing oils*:

— Part 1: *Determination of anticorrosive effect upon steel*
