**Plain bearings — Pedestal plain
bearings —**

Part 1:
Pillow blocks

*Paliers lisses — Paliers lisses à chaise sur le sol —
Partie 1: Supports de paliers*

Reference number
ISO 11687-1:1995(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 11687-1 was prepared by Technical Committee ISO/TC 123, *Plain bearings*, Subcommittee SC 3, *Dimensions, tolerances and construction details*.

ISO 11687 consists of the following parts, under the general title *Plain bearings — Pedestal plain bearings*:

- *Part 1: Pillow blocks*
- *Part 2: Side flange bearings*
- *Part 3: Centre flange bearings*
