
**Textiles — Burning behaviour of bedding
items —**

Part 3:

General test methods for the ignitability by
a small open flame

Textiles — Comportement au feu des articles de literie —

*Partie 3: Méthodes d'essai générales pour l'allumabilité par une petite
flamme nue*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this part of ISO 12952 may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 12952-3 was prepared by the European Committee for Standardization (CEN) in collaboration with ISO Technical Committee TC 38, *Textiles*, Subcommittee SC 19, *Burning behaviour of textiles and textile products*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Throughout the text of this standard, read "...this European Standard..." to mean "...this International Standard...".

ISO 12952 consists of the following parts, under the general title *Textiles — Burning behaviour of bedding items*:

- *Part 1: General test methods for the ignitability by a smouldering cigarette*
- *Part 2: Specific test methods for the ignitability by a smouldering cigarette*
- *Part 3: General test methods for the ignitability by a small open flame*
- *Part 4: Specific test methods for the ignitability by a small open flame*

Annexes A and B of this part of ISO 12952 are for information only.
