

INTERNATIONAL STANDARD

**ISO
1355**

First edition
1989-11-15

Metallic materials — Hardness test — Calibration of standardized blocks to be used for Rockwell superficial hardness testing machines (scales 15N, 30N, 45N, 15T, 30T and 45T)

*Matériaux métalliques — Essai de dureté — Étalonnage des blocs de référence
à utiliser pour les machines d'essai de dureté superficielle Rockwell (échelles 15N,
30N, 45N, 15T, 30T et 45T)*

Reference number
ISO 1355 : 1989 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 1355 was prepared by Technical Committee ISO/TC 164, *Mechanical testing of metals*.

It cancels and replaces ISO Recommendation R 1355: 1970, of which it constitutes a technical revision.

Annex A forms an integral part of this International Standard.
