**Crude petroleum and petroleum  
products — Transfer accountability —  
Assessment of vessel experience factor on  
loading (VEFL) and vessel experience  
factor on discharging (VEFD) of ocean-  
going tanker vessels**

*Pétrole brut et produits pétroliers — Transfert des cargaisons —  
Détermination du facteur d'expérience du navire au chargement (VEFL) et  
du facteur d'expérience du navire au déchargement (VEFD) pour les  
navires de mer de type pétrolier*

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 13740 was prepared by Technical Committee ISO/TC 28, *Petroleum products and lubricants*, Subcommittee SC 6, *Bulk cargo transfer, accountability, inspection and reconciliation*.

Annexes A and B of this International Standard are for information only.
