Rubber, vulcanized — Determination of permeability to gases — Constant volume method

Caoutchouc vulcanisé — Détermination de la perméabilité aux gaz — Méthode à volume constant

Second edition — 1982-12-01

UDC 678.063 : 620.1 : 539.217.5

Ref. No. ISO 1399-1982 (E)

Descriptors : rubber, vulcanized rubber, tests, gas permeability tests.

Price based on 5 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1399 was developed by Technical Committee ISO/TC 45, *Rubber and rubber products*.

This second edition was submitted directly to the ISO Council, in accordance with clause 6.11.2 of part 1 of the Directives for the technical work of ISO. It cancels and replaces the first edition (i.e. ISO 1399-1976), which had been approved by the member bodies of the following countries :

Australia	Hungary	Spain
Austria	India	Sweden
Canada	Iran	Switzerland
Colombia	Israel	Thailand
Czechoslovakia	Italy	Turkey
Egypt, Arab Rep. of	Netherlands	United Kingdom
France	New Zealand	USSR
Germany, F. R.	Poland	

No member body had expressed disapproval of the document.
