
**Animal and vegetable fats and oils —
Determination of stigmastadienes in
vegetable oils —**

Part 1:
Method using capillary-column gas
chromatography (Reference method)

*Corps gras d'origines animale et végétale — Dosage des stigmastadiènes
dans les huiles végétales —*

*Partie 1: Méthode par chromatographie en phase gazeuse sur colonne
capillaire (Méthode de référence)*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 15788-1 was prepared by Technical Committee ISO/TC 34, *Agricultural food products*, Subcommittee SC 11, *Animal and vegetable fats and oils*.

ISO 15788 consists of the following parts, under the general title *Animal and vegetable fats and oils — Determination of stigmastadienes in vegetable oils*:

- *Part 1: Method using capillary-column gas chromatography*
- *Part 2: Method using high-performance liquid chromatography*

Annex A of this part of ISO 15788 is for information only.
