FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 152 has reviewed ISO Recommendation R 1587 and found it technically suitable for transformation. International Standard ISO 1587 therefore replaces ISO Recommendation R 1587-1972 to which it is technically identical.

ISO Recommendation R 1587 was approved by the Member Bodies of the following countries :

Australia	Iran	Romania
Austria	Ireland	South Africa, Rep. of
Brazil	Israel	Spain
Czechoslovakia	Italy	Sweden
Egypt, Arab Rep. of	Netherlands	Thailand
France	Norway	Turkey
Greece	Peru	United Kingdom
Hungary	Poland	
India	Portugal	

The Member Body of the following country expressed disapproval of the Recommendation on technical grounds :

Germany

The Member Bodies of the following countries disapproved the transformation of ISO/R 1587 into an International Standard :

France
Germany
