Information processing — 9-track, 12,7 mm (0.5 in) wide magnetic tape for information interchange recorded at 8 rpmm (200 rpi)

Traitement de l'information — Bande magnétique à 9 pistes, de 12,7 mm (0,5 in) de large, pour l'échange d'information, enregistrée à 8 rangées par millimètre (200 rpi)

First edition — 1975-12-15

UDC 681.327.64

Ref. No. ISO 1862-1975 (E)

Descriptors : data processing, magnetic tapes, half-inch magnetic tape, 9-track magnetic tape, information interchange, specification, data layout, coding.

Price based on 7 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1862 was drawn up by Technical Committee ISO/TC 97, *Computers and information processing*, and circulated to the Member Bodies in November 1974.

It has been approved by the Member Bodies of the following countries :

Belgium	Italy	Spain
Bulgaria	Japan	Switzerland
Czechoslovakia	New Zealand	Turkey
France	Poland	U.S.A.
Germany	Portugal	U.S.S.R.
Hungary	Romania	Yugoslavia
Ireland	South Africa, Rep. of	

No Member Body expressed disapproval of the document.

This International Standard cancels and replaces ISO Recommendation R 1862-1971 of which it constitutes a technical revision.
