

**Phenol, *o*-cresol, *m*-cresol, *p*-cresol, cresylic acid and xylenols
for industrial use — Methods of test —
Part II : Determination of water — Dean and Stark method**

*Phénol, o-crésol, m-crésol, p-crésol, acide crésylique et xylénols à usage industriel — Méthodes d'essai —
Partie II : Dosage de l'eau — Méthode de Dean et Stark*

First edition — 1977-04-15

UDC 661 : 547.562/563 : 543.812

Ref. No. ISO 1897/II-1977 (E)

Descriptors : phenols, phenol, cresols, xlenol, chemical analysis, determination of content, water, volumetric analysis, Karl Fischer reagent.

Price based on 5 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the technical committees were published as ISO Recommendations; these documents are in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 47, *Chemistry*, has reviewed ISO Recommendation R 1898-1971 and found it technically suitable for transformation. Number 1898, however, has been changed to 1897/II. International Standard ISO 1897/II therefore replaces ISO Recommendation R 1898-1971, to which it is technically identical.

ISO Recommendation R 1898 had been approved by the member bodies of the following countries :

Australia	India	South Africa, Rep. of
Belgium	Israel	Spain
Chile	Italy	Switzerland
Czechoslovakia	Japan	Thailand
Egypt, Arab Rep. of	Netherlands	Turkey
France	New Zealand	United Kingdom
Germany	Poland	U.S.S.R.
Greece	Portugal	
Hungary	Romania	

No member body had expressed disapproval of the Recommendation.

The member body of the following country disapproved the transformation of the Recommendation into an International Standard :

Netherlands
