ISO 2070:1997(E)**Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 2070 was prepared by the British Standards Institution (BSI) (as BSI 4140: Part 14:1990) and was adopted under a special "fast-track procedure", by Technical Committee ISO/TC 47, *Chemistry*, in parallel with its approval by the ISO member bodies.

It cancels and replaces ISO 2070:1981 of which it constitutes a technical revision.
