Hacksaw blades —

Part 1: Dimensions for hand blades

Lames de scies droites à métaux —

Partie 1: Dimensions des lames à main

Reference number
ISO 2336-1:1996(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 2336-1 was prepared by Technical Committee ISO/TC 29, *Small tools*.

This first edition of ISO 2336-1 as well as ISO 2336-2:1996 cancels and replaces ISO 2336:1980, which has been technically revised.

ISO 2336 consists of the following parts, under the general title *Hacksaw blades*:

- Part 1: *Dimensions for hand blades*
- Part 2: *Dimensions for machine blades*
