Descriptors : fasteners, threads, screw threads, screws, bolts, nuts (fasteners), dimensions, diameters, thread pitch, designation.

Price based on 5 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, International Standard ISO 263 replaces ISO Recommendation R 263-1962 drawn up by Technical Committee ISO/TC 1, *Screw threads*.

The Member Bodies of the following countries approved the Recommendation :

Argentina	France	New Zealand
Australia	Germany	Norway
Austria	Greece	Poland
Canada	Hungary	Spain
Chile	India	Switzerland
Colombia	Israel	United Kingdom
Czechoslovakia	Italy	U.S.A.
Denmark	Japan	
Finland	Netherlands	

The Member Bodies of the following countries expressed disapproval of the Recommendation on technical grounds :

Bulgaria
Sweden
U.S.S.R.
