# Ammonium sulphate for industrial use — Determination of matter insoluble in water — Gravimetric method

*Sulfate d'ammonium à usage industriel — Détermination des matières insolubles dans l'eau — Méthode gravimétrique*

First edition — 1974-04-01

Ref. No. ISO 2994-1974 (E)

UDC 661.522 : 541.8

**Descriptors :** ammonium compounds, ammonium sulphate, chemical analysis, determination of content, insoluble matter, gravimetric analysis.

Price based on 2 pages

## FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2994 was drawn up by Technical Committee ISO/TC 47, *Chemistry*, and circulated to the Member Bodies in November 1972.

It has been approved by the Member Bodies of the following countries :

|                     |                       |                |
|---------------------|-----------------------|----------------|
| Australia           | India                 | Spain          |
| Austria             | Israel                | Sweden         |
| Belgium             | Italy                 | Switzerland    |
| Czechoslovakia      | Netherlands           | Thailand       |
| Egypt, Arab Rep. of | New Zealand           | Turkey         |
| France              | Poland                | United Kingdom |
| Germany             | Romania               | U.S.S.R.       |
| Hungary             | South Africa, Rep. of |                |

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).

No Member Body expressed disapproval of the document.
