Plywood — Determination of density

Contreplaqué — Détermination de la masse volumique

First edition — 1977-01-15

UDC 674.419.32 : 531.731.2

Ref. No. ISO 3805-1977 (E)

Descriptors : wood products, plywood, physical tests, density measurement, density (mass/volume).

Price based on 2 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3805 was developed by Technical Committee ISO/TC 139, *Plywood*, and was circulated to the member bodies in June 1975.

It has been approved by the member bodies of the following countries :

Austria	Hungary	Romania
Belgium	India	South Africa, Rep. of
Brazil	Iran	Spain
Bulgaria	Israel	Sweden
Canada	Italy	Turkey
Chile	Mexico	United Kingdom
Czechoslovakia	New Zealand	U.S.A.
Finland	Norway	U.S.S.R.
France	Poland	Yugoslavia
Germany	Portugal	

The member body of the following country expressed disapproval of the document on technical grounds :

Australia
