Ref. No. ISO 3811-1979 (E)

Descriptors : food products, meat products, microbiological analysis, counting, bacteria, coliform bacteria.

Price based on 5 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3811 was developed by Technical Committee ISO/TC 34, *Agricultural food products*, and was circulated to the member bodies in May 1975.

It has been approved by the member bodies of the following countries :

Austria	Germany, F. R.	Poland
Brazil	Ghana	Romania
Canada	Hungary	South Africa, Rep. of
Chile	India	Spain
Czechoslovakia	Iran	Thailand
Denmark	Ireland	Turkey
Ethiopia	Mexico	Yugoslavia
France	Netherlands	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Australia
New Zealand
United Kingdom
