Ref. No. ISO 3825-1977 (E)

Descriptors : laboratory glassware, blood transfusion, flasks, chemical tests, determination, chemical resistance.

Price based on 2 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3825 was developed by Technical Committee ISO/TC 76, *Transfusion equipment for medical use*, and was circulated to the member bodies in July 1975.

It has been approved by the member bodies of the following countries :

Australia	Germany	Switzerland
Belgium	Iran	Thailand
Canada	Italy	Turkey
Czechoslovakia	New Zealand	United Kingdom
Denmark	Romania	U.S.A.
France	South Africa, Rep. of	U.S.S.R.

No member body expressed disapproval of the document.
