ISO
3914-1

Second edition
1994-12-01

Textile machinery and accessories — Cylindrical tubes —

Part 1: Recommended main dimensions

*Matériel pour l'industrie textile — Tubes cylindriques —
Partie 1: Dimensions principales recommandées*

Reference number
ISO 3914-1:1994(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 3914-1 was prepared by Technical Committee ISO/TC 72, *Textile machinery and allied machinery and accessories*, Subcommittee SC 2, *Winding and preparatory machinery for fabric manufacture*.

This second edition cancels and replaces the first edition (ISO 3914-1:1982), which has been technically revised.

ISO 3914 consists of the following parts, under the general title *Textile machinery and accessories — Cylindrical tubes*:

- *Part 1: Recommended main dimensions*
- *Part 2: Dimensions, tolerances and designation of tubes for open-end spinning machines*
- *Part 3: Dimensions, tolerances and designation of tubes for tape yarns*
- *Part 4: Dimensions, tolerances and designation of tubes for textured yarns*
- *Part 5: Dimensions, tolerances and designation of tubes for continuous spin-drawn synthetic filament yarns*
