Ref. No. ISO 4059-1978 (E)

Descriptors : piping, pipes (tubes), plastic tubes, polyethylene, pipe fittings, pressure tests, determination, head losses.

Price based on 3 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4059 was developed by Technical Committee ISO/TC 138, *Plastics pipes, fittings and valves for the transport of fluids*, and was circulated to the member bodies in July 1976.

It has been approved by the member bodies of the following countries :

Austria	Israel	Romania
Belgium	Italy	Spain
Canada	Korea, Rep. of	Sweden
Finland	Mexico	Turkey
France	Netherlands	United Kingdom
Germany	New Zealand	U.S.A.
India	Norway	Yugoslavia
Ireland	Poland	

The member body of the following country expressed disapproval of the document on technical grounds :

Switzerland
