Ref. No. ISO 4084-1977 (E)

Descriptors : aircraft industry, aircraft equipment, contactors (switches), operating requirements, performance tests, quality control, performance evaluation, marking, user-supplier relations.

Price based on 7 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4084 was developed by Technical Committee ISO/TC 20, *Aircraft and space vehicles*, and was circulated to the member bodies in October 1976.

It has been approved by the member bodies of the following countries :

Australia	India	Romania
Austria	Italy	Spain
Belgium	Japan	Sweden
Canada	Korea, Rep. of	Turkey
Chile	Mexico	U.S.A.
Czechoslovakia	Philippines	U.S.S.R.
Germany	Poland	Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

France
United Kingdom
