Essential oils (containing tertiary alcohols) — Evaluation of free alcohols content by determination of ester value after cold formylation

Huiles essentielles (contenant des alcools tertiaires) — Évaluation de la teneur en alcools libres par détermination de l'indice d'ester après formylation à froid

First edition — 1978-10-01

OCT 16 1978

UDC 668.5 : 543.851.1

Ref. No. ISO 4096-1978 (E)

Descriptors : essential oils, chemical analysis, determination of content, alcohols, ester number, esterification.

Price based on 2 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4096 was developed by Technical Committee ISO/TC 54, *Essential oils*, and was circulated to the member bodies in February 1977.

It has been approved by the member bodies of the following countries :

Austria	Italy	Netherlands
Canada	Japan	South Africa, Rep. of
France	Kenya	Thailand
India	Korea, Rep. of	Turkey

No member body expressed disapproval of the document.
