Cereals and pulses — Guidance on measurement of the temperature of grain stored in bulk

*Céréales et légumineuses — Directives générales pour le mesurage de
la température des grains entreposés en vrac dans les installations de
stockage*

Reference number
ISO 4112:1990(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 4112 was prepared by Technical Committee ISO/TC 34, *Agricultural food products*.

This second edition cancels and replaces the first edition (ISO 4112:1979), of which the scope has been expanded to include all bulk stores.

Annex A of this International Standard is for information only.
