423

Second edition
1994-05-01

Photography — Processing chemicals — Specifications for hydroquinone

*Photographie — Produits chimiques pour traitement — Spécifications
relatives à l'hydroquinone*

Reference number
ISO 423:1994(E)

ISO 423:1994(E)**Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 423 was prepared by Technical Committee ISO/TC 42, *Photography*.

This second edition cancels and replaces the first edition (ISO 423:1976), which has been technically revised.

Annex A of this International Standard is for information only.
