FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4313 was drawn up by Technical Committee ISO/TC 91, *Surface active agents*, and this second edition was circulated to the Member Bodies in August 1975.

It has been approved by the Member Bodies of the following countries :

Australia	Iran	Spain
Austria	Italy	Switzerland
Belgium	Japan	Thailand
Brazil	Netherlands	Turkey
Canada	New Zealand	United Kingdom
Egypt, Arab Rep. of	Poland	U.S.A.
France	Portugal	U.S.S.R.
Germany	Romania	
India	South Africa, Rep. of	

No Member Body expressed disapproval of the document.
