Data communication — High-level data link control procedures — Consolidation of elements of procedures

Téléinformatique — Procédures de commande de liaison de données à haut niveau — Consolidation des éléments de procédures

Second edition — 1984-12-15

UDC 681.327.8.01

Ref. No. ISO 4335-1983 (E)

Descriptors : data processing, data transmission, control procedures, high-level data link control.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 4335 was prepared by Technical Committee ISO/TC 97, *Information processing systems*.

ISO 4335 was first published in 1979. This second edition cancels and replaces the first edition, of which it constitutes a technical revision.
