

International Standard 4385

K-05-01

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION • МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ • ORGANISATION INTERNATIONALE DE NORMALISATION

Plain bearings — Compression testing of metallic bearing materials

Paliers lisses — Essai de compression des matériaux antifriction

First edition — 1981-12-15

UDC 669.018.24 : 620.173

Ref. No. ISO 4385-1981 (E)

Descriptors : bearings, plain bearings, bearing alloys, tests, mechanical tests, compression tests, definitions, test results.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4385 was developed by Technical Committee ISO/TC 123, *Plain bearings*, and was circulated to the member bodies in January 1979.

It has been approved by the member bodies of the following countries :

Australia	India	Romania
Bulgaria	Italy	South Africa, Rep. of
Chile	Korea, Rep. of	Spain
Czechoslovakia	Libyan Arab Jamahiriya	Sweden
Egypt, Arab Rep. of	Netherlands	United Kingdom
France	New Zealand	USA
Germany, F.R.	Poland	USSR

No member body expressed disapproval of the document.
