Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 444 was developed by Technical Committee ISO/TC 56, *Mica*.

This first edition was submitted directly to the ISO Council as part of the process of transforming ISO Recommendations into International Standards, in accordance with clause 5.10.1 of part 1 of the Directives for the technical work of ISO. It cancels and replaces ISO Recommendation R 444-1965, which had been approved by the member bodies of the following countries :

Argentina	France	Portugal
Australia	India	United Kingdom
Brazil	Japan	USSR
Chile	Korea, Rep. of	
Czechoslovakia	Netherlands	

No member body had expressed disapproval of the document.
