Electrodeposited chromium coatings — Electrolytic corrosion testing (EC test)

Revêtements électrolytiques de chrome — Essai de corrosion électrolytique (Essai EC)

First edition — 1980-10-01

UDC 669.058 : 620.193.7

Ref. No. ISO 4539-1980 (E)

Descriptors : metal coatings, electrodeposited coatings, chromium coatings, tests, corrosion tests, test equipment.

Price based on 6 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4539 was developed by Technical Committee ISO/TC 107, *Metallic and other non-organic coatings*, and was circulated to the member bodies in September 1978.

It has been approved by the member bodies of the following countries :

Bulgaria	Italy	South Africa, Rep. of
Czechoslovakia	Japan	Spain
France	Korea, Rep. of	Sweden
Germany, F.R.	Libyan Arab Jamahiriya	Switzerland
Hungary	Mexico	USA
India	New Zealand	USSR
Ireland	Poland	
Israel	Romania	

The member body of the following country expressed disapproval of the document on technical grounds :

United Kingdom
