Ref. No. ISO 4614-1977 (E)

Descriptors : plastics, castings, melamine resins, food industry, food packaging, chemical analysis, determination of content, formaldehyde, extraction analysis.

Price based on 4 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4614 was developed by Technical Committee ISO/TC 61, *Plastics*, and was circulated to the member bodies in December 1975.

It has been approved by the member bodies of the following countries :

Australia	Hungary	Portugal
Austria	India	Romania
Belgium	Iran	Spain
Brazil	Ireland	Sweden
Canada	Israel	Switzerland
Czechoslovakia	Japan	Turkey
Finland	Mexico	United Kingdom
France	Netherlands	Yugoslavia
Germany	Poland	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

U.S.A.
U.S.S.R.
