Wood — Determination of volumetric shrinkage

Bois — Détermination du retrait volumique

First edition — 1982-12-01

UDC 674.03 : 620.193.23 539.388.8

Ref. No. ISO 4858-1982 (E)

Descriptors : wood, tests, dimensional stability tests, shrinkage, volume measurement.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4858 was developed by Technical Committee ISO/TC 55, *Sawn timber and sawlogs*, and was circulated to the member bodies in April 1980.

It has been approved by the member bodies of the following countries:

Australia	France	Poland
Austria	Ghana	Romania
Belgium	Hungary	South Africa, Rep. of
Bulgaria	India	Spain
Czechoslovakia	Italy	Sweden
Egypt, Arab Rep. of	Korea, Rep. of	Turkey
Finland	Norway	USSR

The member bodies of the following countries expressed disapproval of the document on technical grounds:

Canada
Ireland
Netherlands
