Ref. No. ISO 5407-1981 (E)

Descriptors : die pellets, dimensions, dimensional tolerances.

Price based on 4 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5407 was developed by Technical Committee ISO/TC 29, *Small tools*, and was circulated to the member bodies in May 1980.

It has been approved by the member bodies of the following countries :

Australia	India	Poland
Austria	Israel	Romania
Belgium	Italy	South Africa, Rep. of
Czechoslovakia	Japan	Spain
France	Korea, Dem. P. Rep. of	Sweden
Germany, F.R.	Korea, Rep. of	United Kingdom
Hungary	Netherlands	USA

The member body of the following country expressed disapproval of the document on technical grounds :

USSR
