Ferrosilicon — Specification and conditions of delivery

Ferro-silicium — Spécifications et conditions de livraison

First edition — 1980-12-01

UDC 669.15'782-198

Ref. No. ISO 5445-1980 (E)

Descriptors : ferroalloys, ferrosilicon, materials specifications, chemical composition, delivery, quality control, grain size.

Price based on 4 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5445 was developed by Technical Committee ISO/TC 132, *Ferroalloys*, and was circulated to the member bodies in November 1979.

It has been approved by the member bodies of the following countries :

Australia	India	Romania
Austria	Italy	South Africa, Rep. of
Brazil	Japan	Sweden
Canada	Libyan Arab Jamahiriya	United Kingdom
China	Norway	USA
Czechoslovakia	Pakistan	USSR
France	Poland	Yugoslavia
Germany, F.R.	Portugal	

No member body expressed disapproval of the document.
