

International Standard

5654 / 1

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION • МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ • ORGANISATION INTERNATIONALE DE NORMALISATION

Information processing — Data interchange on 200 mm (8 in) flexible disk cartridges using two-frequency recording at 13 262 ftprad on one side — Part 1 : Dimensional, physical and magnetic characteristics

Traitement de l'information — Échange d'information sur cartouches à disquette de 200 mm (8 in) utilisant un enregistrement à deux fréquences à 13 262 ftprad sur une face — Partie 1 : Caractéristiques dimensionnelles, physiques et magnétiques

Second edition — 1984-12-01

UDC 681.327.63

Ref. No. ISO 5654/1-1984 (E)

Descriptors : data processing, information interchange, data recording devices, magnetic disks, flexible disks, specifications, dimensions, physical properties, magnetic properties

Price based on 16 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 5654/1 was prepared by Technical Committee ISO/TC 97, *Information processing systems*.

ISO 5654/1 was first published in 1982. This second edition cancels and replaces the first edition, of which it constitutes a technical revision.
