Ref. No. ISO 5986-1983 (E)

Descriptors : animal feeding products, fats, chemical analysis, determination of content, ethyl ether, test results.

Price based on 3 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5986 was developed by Technical Committee ISO/TC 34, *Agricultural food products*, and was circulated to the member bodies in October 1982.

It has been approved by the member bodies of the following countries :

Australia	Iran	Romania
Austria	Iraq	South Africa, Rep. of
Brazil	Israel	Spain
Canada	Italy	Sri Lanka
Chile	Kenya	Thailand
Czechoslovakia	Malaysia	Turkey
Egypt, Arab Rep. of	Mexico	United Kingdom
Ethiopia	Netherlands	USSR
France	New Zealand	Yugoslavia
Hungary	Peru	
India	Portugal	

The member body of the following country expressed disapproval of the document on technical grounds :

USA
