Shipbuilding — Inland navigation — Pilot craft — Identification painting and inscriptions

Construction navale — Navigation intérieure — Engins flottants pilotes — Peintures et inscriptions distinctives

First edition — 1982-08-01

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6217 was developed by Technical Committee ISO/TC 8, *Shipbuilding and marine structures*, and was circulated to the member bodies in October 1981.

It has been approved by the member bodies of the following countries :

Austria	India	Poland
Belgium	Italy	Portugal
Bulgaria	Japan	Romania
Czechoslovakia	Korea, Rep. of	Spain
Egypt, Arab Rep. of	Mexico	USSR
France	Norway	Yugoslavia

The member body of the following country expressed disapproval of the document on technical grounds :

United Kingdom
