Petroleum products — Mineral oils — Determination of interfacial tension of oil against water — Ring method

Produits pétroliers — Huiles minérales — Détermination de la tension interfaciale entre huile et eau — Méthode de l'anneau

First edition — 1983-05-15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6295 was developed by Technical Committee ISO/TC 28, *Petroleum products and lubricants*, and was circulated to the member bodies in February 1982.

It has been approved by the member bodies of the following countries :

Australia	Hungary	Portugal
Austria	India	Romania
Belgium	Iraq	South Africa, Rep.
Brazil	Israel	Spain
Bulgaria	Italy	Sri Lanka
Canada	Japan	Sweden
Czechoslovakia	Korea, Rep. of	Switzerland
Egypt, Arab Rep. of	Mexico	USA
France	Netherlands	USSR
Germany, F.R.	Poland	Venezuela

No member body expressed disapproval of the document.
