Road vehicles — Brake linings — Internal shear strength of lining material — Test procedure

Véhicules routiers — Garnitures de freins — Résistance au cisaillement interne du matériau de garniture — Méthode d'essai

First edition — 1980-06-01

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6311 was developed by Technical Committee ISO/TC 22, *Road vehicles*, and was circulated to the member bodies in November 1978

It has been approved by the member bodies of the following countries :

Austria	Ireland	Spain
Belgium	Italy	Sweden
Brazil	Japan	Switzerland
Bulgaria	Korea, Dem P Rep of	Turkey
Czechoslovakia	Mexico	United Kingdom
Denmark	Netherlands	USA
France	Poland	USSR
Germany, F R.	Romania	Yugoslavia
India	South Africa, Rep. of	

No member body expressed disapproval of the document
