Animal and vegetable fats and oils — Determination of gallates content — Molecular absorption spectrometric method

Corps gras d'origines animale et végétale — Dosage des gallates — Méthode par spectrométrie d'absorption moléculaire

First edition — 1983-11-15

UDC 664.3 : 543.42 : 547.581

Ref. No. ISO 6464-1983 (E)

Descriptors : animal fats, vegetable fats, vegetable oils, tests, determination of content, antioxidants, spectroscopy.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6464 was developed by Technical Committee ISO/TC 34, *Agricultural food products*, and was circulated to the member bodies in August 1982.

It has been approved by the member bodies of the following countries :

Austria	Iraq	South Africa, Rep. of
Bulgaria	Israel	Spain
Canada	Kenya	Sri Lanka
Chile	Korea, Dem. P. Rep. of	Tanzania
Egypt, Arab Rep. of	Korea, Rep. of	Thailand
Ethiopia	Malaysia	Turkey
France	Netherlands	United Kingdom
Germany, F. R.	New Zealand	USSR
Hungary	Philippines	Yugoslavia
India	Portugal	
Iran	Romania	

No member body expressed disapproval of the document.
