Dried milk — Determination of nitrate and nitrite contents — Method by cadmium reduction and photometry

Lait sec — Détermination des teneurs en nitrates et en nitrites — Méthode par réduction au cadmium et photométrie

First edition — 1982-12-01

UDC 637.143 : 543.242.8 : 546.173/.175

Ref. No. ISO 6736-1982 (E)

Descriptors : agricultural products, dairy products, milk, dried milk, chemical analysis, determination of content, nitrates, nitrites, spectrophotometric analysis.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6736 was developed by Technical Committee ISO/TC 34, *Agricultural food products*, and was circulated to the member bodies in June 1981.

It has been approved by the member bodies of the following countries :

Australia	India	Romania
Austria	Iraq	South Africa, Rep. of
Belgium	Israel	Spain
Canada	Korea, Rep. of	Sri Lanka
Czechoslovakia	Netherlands	Tanzania
Egypt, Arab Rep. of	New Zealand	Thailand
Ethiopia	Peru	Turkey
France	Philippines	United Kingdom
Germany, F.R.	Poland	USSR
Hungary	Portugal	Yugoslavia

No member body expressed disapproval of the document.
