INTERNATIONAL ORGANIZATION FOR STANDARDIZATION • МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ • ORGANISATION INTERNATIONALE DE NORMALISATION

Surface active agents — Washing powders — Determination of total boron content — Titrimetric method

Agents de surface — Poudres à laver — Dosage du bore total — Méthode titrimétrique

First edition — 1981-04-01

UDC 661.185 : 543.24 : 546.27

Ref. No. ISO 6835-1981 (E)

Descriptors : surfactants, tests, determination of content, boron, chemical analysis, titration.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6835 was developed by Technical Committee ISO/TC 91, *Surface active agents*, and was circulated to the member bodies in January 1980.

It has been approved by the member bodies of the following countries :

Australia	Germany, F.R.	South Africa, Rep. of
Austria	Hungary	Spain
Belgium	India	Switzerland
China	Japan	USA
Egypt, Arab Rep. of	Korea, Rep. of	USSR
France	Romania	

The member body of the following country expressed disapproval of the document on technical grounds :

Netherlands

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC)
