

International Standard

6901

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION • МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ • ORGANISATION INTERNATIONALE DE NORMALISATION

Information processing — Magnetic disk for data storage devices — 160 000 flux transitions per track, 356 mm (14 in) outer diameter

Traitement de l'information — Disque magnétique pour unités de stockage des données — 160 000 transitions de flux par piste, diamètre extérieur 356 mm (14 in)

First edition — 1984-12-15

UDC 681.327.63

Ref. No. ISO 6901-1984 (E)

Descriptors : data processing, information interchange, data storage devices, magnetic disks, specifications, dimensions, tests, physical properties, magnetic properties, surface properties, surface defects.

Price based on 16 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 6901 was prepared by Technical Committee ISO/TC 97, *Information processing systems*.
